Re: Proposed Land Disturbing Activity
Sabal Trail Transmission – Spread 2
Stewart, Webster, Terrell, Lee, Dougherty and Mitchell Counties, Georgia
File: SW-Sabal-Spread 2 (Revision 3)

Dear Mr. Gehle:

In accordance with the General NPDES Permit No. GAR100002 for Storm Water Discharges Associated with Construction Activities for Infrastructure Construction Projects, the Revised Erosion, Sedimentation and Pollution Control Plan (ESPCP) submitted for change in design/workspace and reduction in land disturbance has been reviewed for deficiencies in the identification of waters of the state and potential encroachment of land disturbing activities within 25 foot immediately adjacent and upland of the identifiable point from which the State mandated buffer is measured.

Based upon this review of the Revised ESPCP, the EPD has determined the following:

- (1) This project revision does **not** have deficiencies in the identification of waters of the state.
- (2) This project revision will **not** require a buffer variance from the EPD.

However, the EPD reserves the right to change this determination if information that conflicts with the original submittal is obtained during a later site inspection.

If additional information is required, please contact me at 912-554-3492.

Sincerely,

Shannon K. Winsness
Environmental Specialist
