

Many homes are rented, and the military owners are in another state or overseas and they have not had adequate time to rebutt or some have not even been notified.

As far as the variances requested for the 4 June meeting, it is completely unacceptable for them to use our existing fence as their border. These fences have large gaps and are already over 5-6 years old. They are not tall enough to provide adequate protection or privacy, especially as many have play grounds for young children above that height.

Any type of business would need additional, not fewer buffer area standards to include a solid, much taller fence, much more additional trees & distance to account for any type of outdoor recreational business. Our peaceful neighborhood would be destroyed having a noisy & potentially hazardous business encroach.

Sincerely,  
W. Lynn
