Mr. Bill Slaughter, Chairman
Lowndes County Commissioners
PO Box 1349
Valdosta, GA 31603

Dear Mr. Slaughter:

This is to advise that the term of Lonnie Denton, who is a member of the Lowndes County Department of Family and Children Services Board, expires on 6/30/2024. Mr. Denton has expressed a willingness to serve another term; he has been an active Chairman of our board since 7/1/1989. Mr. Denton's knowledge and support of the agency are a tremendous asset. He has been a dedicated member of the Board and is willing to continue to serve. I request that he be re-appointed for another five-year term.

If you choose to appoint Mr. Denton to another term, please send me notification to the address below. If you choose not to reappoint Mr. Denton, the law requires that the County Commission appoint a successor. DHS supports consideration of a representation from a cross section of the local community. This can serve to strengthen the impact of the public assistance and social services to residents of our county.

If I can be of any help, please do not hesitate to contact me.

We respectfully submit this quotation for the following USED Toyota Internal Combustion Lift Truck (1 each):

Toyota...Proud to be the world's #1 forklift manufacturer!

USED TOYOTA MODEL 8FGU15, Internal Combustion Lift Truck, quality engineered with the following specification:

- Pneumatic Tires
- LP Gas Powered - UL Type "LP" Rating

This forklift is equipped with a 3-Way Catalytic Muffler System as standard equipment, and conforms to current Federal EPA and California ARB regulations for off-road large spark ignited engines.

SYSTEM OF ACTIVE STABILITY™ (SAS)

Toyota's industry exclusive System of Active Stability (SAS) helps reduce lift truck instability by electronically monitoring and controlling various functions of the lift truck.

- **Active Control Rear Stabilizer:** Various lift truck sensors simultaneously monitor vehicle speed, fork height, load weight, and vehicle yaw (or angular acceleration). Should the operator inadvertently place the truck in a potentially unstable lateral condition, the sensors trigger the SAS controller to activate the Active Control Rear Stabilizer to help reduce the likelihood of a lateral tip over. (Note: Does not apply to dual drive configured models)
- **Active Mast Function Controller (AMC):** Should the operator inadvertently place the lift truck in a potentially unstable longitudinal condition, these same sensors trigger the SAS controller to activate the AMC, which limits forward tilt and/or tilt back speed to help reduce the likelihood of a longitudinal tip over.
